

PMW 120

BATTLESPACE AWARENESS
AND INFORMATION OPERATIONS

Control the Information, Own the Battlespace

VISION

Enduring peace through strength enabled by unmatched information and electronic warfare capabilities for the future fleet

MISSION

We create and break kill webs for the Warfighter by collaborating with the fleet, joint forces, allies, and partners to develop, deliver, and sustain integrated information and electronic warfare capabilities

TOP PROGRAMS

Distributed Common Ground System-Navy (DCGS-N) Family of Systems (FoS)

Software Acquisition Pathway

Serves as the Navy's flagship Intelligence, Surveillance, Reconnaissance, and Targeting (ISRT) support capability, forming part of the DoD's broader DCGS-N ecosystem

Maritime Domain Awareness (MDA)

Software Acquisition Pathway

Provides vessel, people, cargo, and infrastructure information to the Navy, interagency, and international partners

Ship's Signal Exploitation Equipment (SSEE) FoS

Acquisition Category II

Searches for, identifies, locates, exploits, denies, and degrades adversary communications

Spectral

Acquisition Category II

Detects, classifies, and tracks signals of interest to improve automation, operability, and intuitiveness in the Tasking, Collection, Processing, Exploitation, and Dissemination (TCPED) process

Horizon

Software Acquisition Pathway

Assesses threats, visualizes risk, and provides actionable recommendations for commanders to exploit opportunities while managing risk

FY 26-27 PRIORITIES

Integrated Mission Value

Deliver integrated mission outcomes aligned to fleet needs in three key focus areas: Battlespace Awareness, Targeting, and Counter-Targeting

Fight from the MOC (FFTM)

Deliver Information Operations (IO), Intelligence, Surveillance, and Reconnaissance (ISR), and Mission Planning and Theater Effects (MPTE) equipment and capabilities to the Maritime Operations Center (MOC) in alignment with Navy and DoD strategies

Common Development Environment (CDE) / Common Hosting Environment (CHE)

Provide a common platform and services infrastructure with a set of tools, including DevOps and DevSecOps capabilities, commonly used by developers to support integration and disconnected development sites

Proactive Industry Engagement

Drive innovative solutions and fulfill key technology areas of interest by establishing strategic partnerships with forward-thinking businesses

PMW 120

Agile. Decisive. Lethal.
